

UniPak is proud to present **Olympic-Net Bale Net**.

UniPak **Olympic-Net** is designed for lighter crops like silage and hay - green net for green material. It fits well to all balers in a 1.23m wide application and requires a minimum of 3 wraps for silage and a minimum of 4 wraps for hay. **Olympic-Net is not suitable for use with straw.**

With **Olympic-Net** you will minimise net waste in the baling process and maximise efficiency. Long lengths of 4550m mean you won't have to change rolls over so often, increasing your efficiency and decreasing your downtime.

| | | |
|--------------------------|-----|------|
| Nominal Width (±1) | cm | 123 |
| Length (+1%) | m | 4550 |
| Diameter (±1) | cm | 28 |
| Total Weight (±1) | kg | 47.0 |
| Breaking Strength (± 25) | kgf | 270 |
| Elongation (± 5) | % | 20 |
| Grams / Metre | g | 9.5 |

| WIDTH | LENGTH | COLOUR | EDGE STRIP |
|-------|--------|--------|------------|
| 1.23m | 4550 | Black | White-Red |

KEY FEATURES:

- Super high UV stabilisation and protection
- Cost-effective solution with 4550m
- Guaranteed length and universal baler compatibility
- 270 kg/m
